

Our Doctor

The human foot is extremely complex involving 26 bones, 33 joints, and over 100 muscles, ligaments, and tendons. With these intricacies, it is not surprising that most people will experience some kind of problem with their feet at some point in their lives.

The podiatrists at CMI are dedicated to providing the highest quality of foot care to all citizens of Aiken and the surrounding areas. Our foot doctors specialize in the most current podiatric medical and surgical treatments for all foot and ankle conditions.

Dr. Angela Molnar

Undergraduate: Marshall University
DPM: The Ohio College of Podiatric Medicine
Residency: 3 year surgical residency at James H. Quillen VA Medical Ctr/Foot and Leg Healthcare Specialists.

Our podiatry office utilizes the most advanced techniques available to diagnose and treat all foot conditions.

- In-office x-rays and ultrasound are performed the same day as your appointment and we will review each study with you personally. This allows us to begin an individualized treatment plan right away to get you back on your feet faster!
- Computer gait analysis evaluates plantar foot pressures and gait evaluation to design and fabricate prescription foot orthoses.
- PADnet is a non-invasive test that can be completed during a regular office visit to help identify patients with vascular disease.
- We perform all surgical procedures at The Surgery Center of Aiken and Aiken Regional Medical Center. We also perform minor in-office surgical procedures.

• With Diabetes reaching epidemic proportions in the United States, we at CMI understand the importance in keeping diabetic feet healthy. We perform a comprehensive diabetic foot care exam on all diabetic patients. We also offer epidermal nerve fiber density testing to diagnose small fiber neuropathy in diabetics.

We participate in the Medicare Diabetic Shoe Program!

Office Hours:

- Monday 8:30am – 5:00pm
